b. TRANSPORTATION MONITORING

One month after Certificates of Occupancy have been issued for the equivalent of one-third of the project (413 dwelling units) or prior to Final Site Plan approval for the 826 dwelling unit, which ever comes first, a transportation monitoring program shall be initiated. Results shall be included with each application for site plan approval and applicable annual report thereafter when the number of PM peak trips for the project equals or exceeds 373. The report shall include the information specified below.

1. Peak-hour traffic counts at the project entrance to verify that the projected number of external trips for the development are not exceeded. Counts may be required on a periodic basis until the expiration date of the Development Order as determined by Manatee County pursuant to the results of the counts and development generated traffic. Said counts shall not be required more frequently than tri-annually (every three years). If any report indicates that the total project P.M. peak-hour trips reach 75% of projected counts, counts will be required bi-annually (every two years). If any report indicates that the total project P.M. peak-hour trips exceed projected counts by more than 10 percent, Manatee County shall conduct a substantial deviation determination pursuant to Subsection

380.06(19), Florida Statutes. If the variance is determined to be a substantial deviation, the revised transportation analysis required pursuant to Subsection 380.06(19), Florida Statutes, shall be based upon results of the monitoring program and agreements reached at another transportation methodology meeting to be held prior to the preparation of the new analysis. The County shall amend the rezone ordinance to change or require additional roadway improvements, if Warranted*, prior to any further final site plan approvals.

2. If monitoring indicates that expected project P.M. peak-hour traffic counts are being exceeded by five (5) percent pursuant to the ADA*, then the Developer* shall conduct a capacity analysis to determine an Acceptable Level of Service* at the intersections of University Parkway and Tuttle Avenue, University Parkway and Lockwood Ridge, University Parkway and Whitfield, University Parkway and Longwood Run/Project Entrance, University Parkway and U.S. 301, and University Parkway and I-75 West Ramp, then the Developer* shall conduct a capacity analysis to demonstrate an Acceptable Level of Service*. In order for the intersections to operate as shown in the Developer's* submittal, adequate storage must be provided. If deficiencies are identified in storage lengths, the Developer* will be responsible for providing adequate storage before further site plan approvals.

- B.(2) The Developer* has provided a location for a bus stop at a location on University Parkway near the project entrance when Manatee County Transit commences regularly scheduled service to the area. (This condition provides the Transportation Management System required by TBRPC).

Any changes to the Surface Water Quality Monitoring Program Criteria, as outlined in Exhibit J, shall be submitted to the City of Bradenton and TBRPC for review and comment and approved by Manatee County.

Should Manatee County adopt a Comprehensive Evers Reservoir Watershed Surface Water Quality Monitoring Program and the Developer* participates in this Comprehensive Surface Water Quality Monitoring Program, then the Developer*, with the approval by Manatee County and TBRPC, may terminate the required Surface Water Quality Monitoring Program contained in this rezone ordinance.

- D.(3) The Master Drainage Plan as required pursuant to MDO* condition #5 and TBRPC DRI report condition #2 on page 9 has been reviewed and approved by the TBRPC, the City of Bradenton, and Manatee County.
